

## Science progression document

### EYFS

**Birth to 5 matters**

**Range 3 (18-24 months)**

- Is curious and interested to explore new and familiar experiences in nature: grass, mud, puddles, plants, animal life
- Explores objects by linking together different approaches: shaking, hitting, looking, feeling, tasting, mouthing, pulling, turning and poking
- Remembers where objects belong
- Matches parts of objects that fit together, e.g. puts lid on teapot

**Range 4 (24-26 months)**

- Notices detailed features of objects in their environment
- Can talk about some of the things they have observed such as plants, animals, natural and found objects
- Enjoys playing with small world reconstructions, building on first-hand experiences, e.g. visiting farms, garages, train tracks, walking by river or lake

**Range 5 (36-38 months)**

- Comments and asks questions about aspects of their familiar world such as the place where they live or the natural world
- Talks about why things happen and how things work
- Developing an understanding of growth, decay, and changes over time
- Shows care and concern for living things and the environment
- Begin to understand the effect their behaviour can have on the environment

**Range 6 (48-60 months)**

- Looks closely at similarities, differences, patterns and change in nature
- Knows about similarities and differences in relation to places, objects, materials and living things
- Talks about the features of their own immediate environment and how environments might vary from one another
- Makes observations of animals and plants and explains why some things occur, and talks about changes
